

# The Blood Drive Room

- Thank you for opening your doors to the Red Cross! The above diagram is an example of what your space might look like set up for a blood drive.
- The American Red Cross will bring all the supplies needed day-of (right down to the juice and cookies!) The only thing that doesn't fit on our truck are the tables and chairs.
- Please provide access to about **6-8 rectangular tables** and about **20-25 chairs**. You can leave them on the carts or however you store them – our team will set them up day-of during setup.
- Please have the room cleared except for the tables and chairs that are needed for the blood drive. That might mean removing any extra furniture that's usually in the room.
- For safety reasons, please try to set the temperature as close to 70° as you can when you set up the room. That might mean heat in the cooler months and air conditioning in the warmer months.
