---

\$400 to R/D/I. We have wall track to hang the overhead cabinet and have a leg for the corner. The only thing you might want to get is a tackboard for under the cabinet. Thanks!

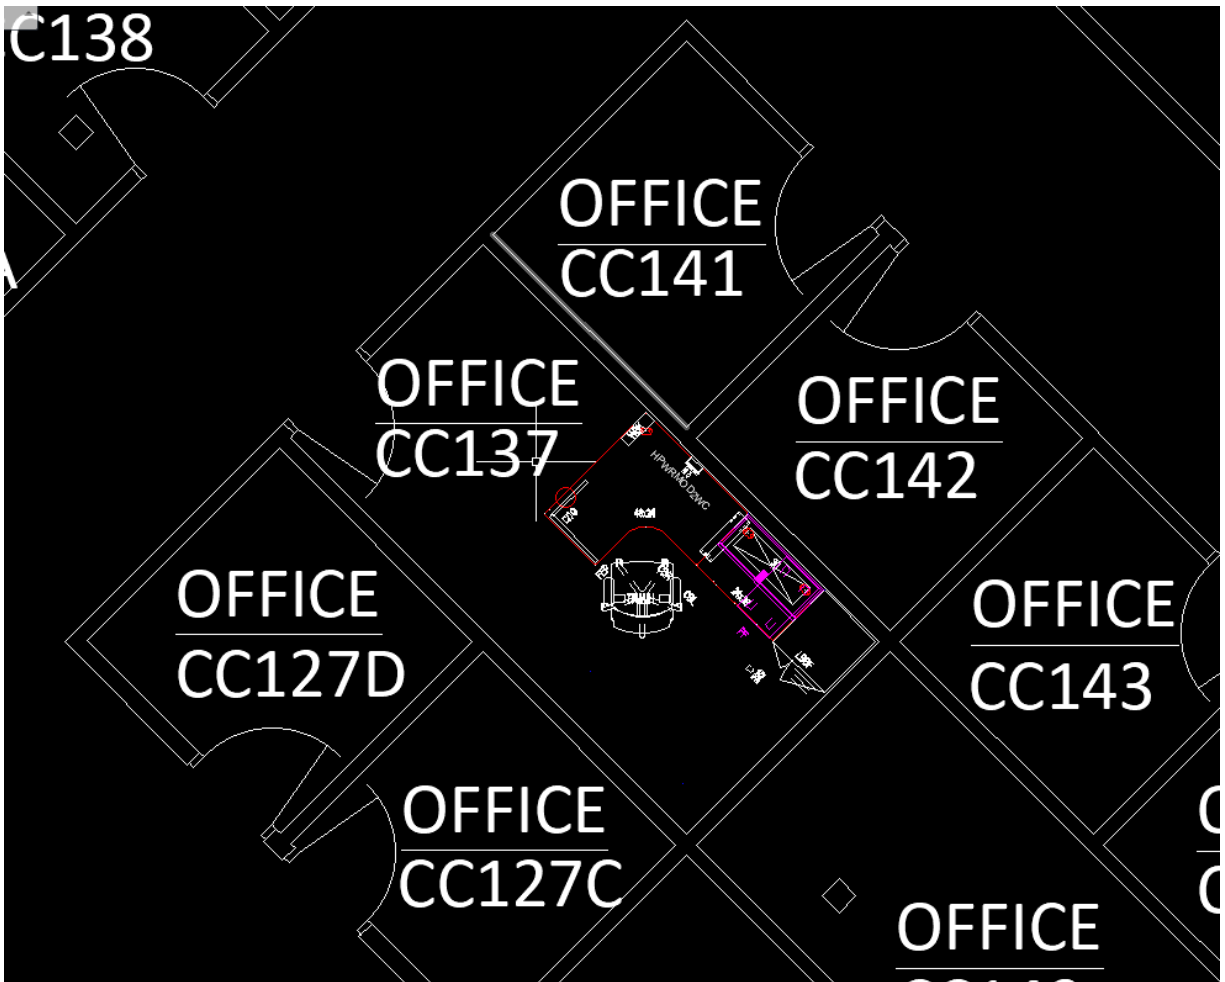

Steve

Steve,

Can you please provide me with a quote for you to bring ONE workstation back from your warehouse and install it in CC137, per the drawing below? I do not want any cubical walls installed, so please tell me if this is possible because I am concerned about the support at the outer most corner. I would want one 36" wide upper to be attached to the wall on bracket (channel), but I don't know if you have any of those parts. Possibly a BBF, instead of FF ped. The room would need to be painted and carpet replaced before your install, so timeline would be 2<sup>nd</sup> or 3<sup>rd</sup> week in July for the install (for sure install before August 1).

Thanks,

**Tony Ronsman**
